

HEATSEEKER
DIAMOND

SAVE ENERGY AND WATER AROUND THE POOL

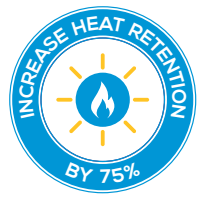

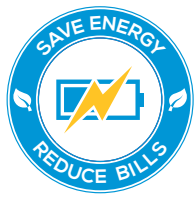

SOLAR POOL COVERS ARE A MUST-HAVE ADDITION TO YOUR SWIMMING POOL OR SPA. ONCE YOU HAVE HEATED YOUR POOL, THE BEST WAY TO ENSURE THE HEAT STAYS THERE ALL YEAR ROUND IS WITH A SOLAR COVER.

The Diamond-shaped bubble allows for closer spacing and therefore increases insulation, offering 14.6% greater heat retention than traditional round bubble covers. With total heat retention up to a massive 75%, you will increase your pool temperature by up to 8°C whilst reducing CO² emissions and savings on energy.

Supreme Heating
Our Innovation. Your Lifestyle.

The enhanced Heatseeker Diamond Space Age, available in 600 micron, features a silver/aluminium heat shield, which allows the collection of heat from the sun's rays, reflecting otherwise lost heat back into the pool.

Heatseeker Diamond pool covers will reduce water evaporation by up to 97%, providing water savings of approximately 50,000–70,000 litres per year depending on where you are situated in Australia, and will reduce your chemical consumption by 50–70%. A pool cover will also minimise maintenance by decreasing the amount of dust and general debris entering your pool.

City	Evaporation per m ²		Annual Water Savings
	Annually	Daily	
MEL	1400mm	3.9mm	50,400L
SYD	1600mm	4.5mm	57,600L
QLD	1700mm	4.8mm	61,200L
SA	1800mm	5.1mm	64,800L
WA	2000mm	5.6mm	72,000L

Tonnes CO ² per year	
Gas without pool cover	17,146kg
Gas with pool cover	4,589kg
Heat Pump without pool cover	37,622kg
Heat Pump with pool cover	6,020kg

Water Saving figures are based on Bureau of Meteorology annual evaporation rates. Energy Saving graph is based on data and figures from "pool heat" simulation program.

STAINLESS STEEL ROLLER SYSTEMS

Supreme Heating's Roller is made from a stainless steel frame and powder coated for added protection in Coastal regions. It comes with a wheel, handle and brake to ensure your cover is easy to wind on and off.

The heavy duty castor wheels allow for full mobility and the ease to store away from the pool if necessary.

Each roller has a protective sun cover and fully adjustable strap system to fix to the cover.

Product Description	Tube Size	Max Width	Max Size
SR2H Roller (including Sun Cover)	85mm-90mm	5.0m	50m ²
SR3H Roller (including Sun Cover)	105mm-110mm	6.5m	75m ²
SR4H Roller (including Sun Cover)	125mm-130mm	8.0m	100m ²

*telescopic-inner and outer tube diameters.

AVAILABLE WALL THICKNESS & WARRANTY
Micron or UM = Wall thickness of cover material
